Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each

Customer Journey Map

Phase of Journey	Stage 1	Stage 2	Stage 3
Actions <i>What does the customer do?</i>	Inputs applicant details and uploads batch application files into the Flask interface.	Submits data for automated cleaning, missing value imputation, and model execution.	Reviews generated predictions to fast-track low-risk profiles or flag high-risk cases.
Touchpoint <i>What part of the service do they interact with?</i>	Flask Web Application UI and data entry forms.	Python backend server and pre-trained XG Boost model.	Prediction Result Page and Risk Flag Dashboard.
Customer Thought <i>What is the customer thinking?</i>	"Is this web form fast enough for processing multiple applications?"	"Will the XG Boost model maintain its 81.1% testing accuracy on this live data?"	"This tool dramatically reduces screening time while keeping our risk low."
Customer Feeling <i>What is the customer feeling?</i>	Optimistic about a streamlined,	Reassured by automated validation and rapid data processing.	Confident in making objective, data-driven credit decisions

	digital submission workflow.		
--	------------------------------	--	--

Process Ownership <i>Who is in the lead on this?</i>	• Frontend Web Developer / UI Designer	• Data Scientist / Machine Learning Engineer	• Bank Credit Officer / Financial Analyst
Opportunities <i>How can we improve this stage?</i>	• Integrate OCR technology to automatically scan and autofill physical application forms.	• Implement continuous retraining pipelines to keep improving XG Boost test accuracy.	• Add automated email notifications for instant approval or document verification alerts.
