

Project Demo Planning

Date	8 July 2026
Team ID	XXXXXX
Project Name	Smart Lener
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Slide Deck	Introduce the team, present the problem statement (inefficient manual loan evaluation, non-performing assets), and explain the "Smart Lender" solution.	1.5 mins	Pathuri Tejasri (Team Lead)
2	Data Analysis & Viz	Showcase key data insights, correlation trends, and distributions (Matplotlib/Seaborn plots) that influenced model parameters.	1.5 mins	Triveni Thumarada
3	Data Prep & ML Pipelines	Explain the data preprocessing pipeline (handling missing values, categorical encoding) and compare the 4 classification models (Decision Tree, RF, KNN, XGBoost).	2.0 mins	Hima Bindu Mareedu

S.No	Demo Section	Description	Duration (mins)	Responsible Member
4	Live App Demo (Scenario 1)	Demonstrate the active Flask UI showing a low-risk applicant (salaried, good credit history) getting fast-track approval.	1.5 mins	Raghava Garlapati
5	Live App Demo (Scenario 2)	Demonstrate the active Flask UI showing a high-risk applicant (self-employed, no credit history) being flagged for manual verification.	1.5 mins	Haneef Jani Shaik
6	Summary & Conclusion	Share the performance summary (XGBoost at 94.7% train / 81.1% test accuracy), target business impact, and conclude.	2.0 mins	Pathuri Tejasri (Team Lead)

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Frame the core issue: manual loan processing is slow and increases risk. Pitch Smart Lender as the high-accuracy automated alternative.
2	Solution Overview	Briefly highlight Python, Flask, and the machine learning pipeline, focusing on how the highest-performing model (XGBoost) was identified and deployed.
3	Live Feature Demonstration	Run the live Flask app. Input the mock parameters for Scenario 1 (Approved) and Scenario 2 (Flagged/Rejected) to show real-time inference.
4	Q&A Session	Team stands ready to answer questions about feature imputation, XGBoost hyperparameters, and cloud deployment.
